

Crain's names Pragma amongst top 100 companies to work in New York

9 October 2017 – New York: Pragma, a multi-asset quantitative trading technology provider, was named one of the best places to work in New York by business magazine Crain's.

The list recognizes companies from across a wide range of industries, from advertising to asset management. Crain's says the companies it selected for the final list stood out because they "go above and beyond to nurture inspiring and supportive workplaces".

Work at Pragma is diverse, demanding, and rewarding. Pragma's quant team is renowned across the financial world, and the company has a strong reputation for leading industry thinking through the publication of original trading research that shows how the markets really work.

Pragma has focused on building an environment more like a technology firm than a bank. Its open culture makes it a haven for seasoned professionals who want to have a meaningful impact on business results. As a result, it has attracted the most capable and motivated talent from finance and technology.

David Mechner, CEO of Pragma Securities, comments: "Pragma is only as good as the people who work here and support its growth. We have a talented team of technologists, sales, marketing and support staff with real expertise of the structure, the nuances of the markets we work in and the needs of our customers. I am very proud that the culture we have built together at Pragma has been recognized by Crain's."
